

NO.	AD	Poll Site Name	Address	Ramps	Exterior Signage	Entryways/Pathways	Interior Signage	Interior Access (Includes BMD placement)	Other Accessibility Observations	BMD Comments	ADA Coordinator	Checklist same as CIDNY's	Other Comments	Accessible Bathroom
		Manhattan				Exterior Pathway			Voting Area					
1		PS 206	508 E. 120 St., NY, NY 10035	The ramp had long handrails so turning could be difficult for someone with a wheel chair or walker. (See photo #1).	There was no accessibility sign at the main entrance.	The path was not free of obstacles. (See photo #2).					Ednita Cheek			Yes
2		PS 57	176 E. 115 St. NY, 10029			The entrance had a double-leaf door with 28" clearance space between the doors. (See photo #3).					Maria Caraballo			
3		Riverton Apartments	2200 Madison Avenue, NY, NY 10037					The BMD has clearance of 2'3"x5". The refrigerator was connected to the wall on left side of BMD.			Gloria Wright		The spacing could not be corrected as the BMD was plugged into the same outlet as the refrigerator. The Coordinator tried to work with the space and issues.	
4		Riverside Park Community	3333A Broadway, NY, NY 10031		No signs along path except at main entrance and by alternate entry, that is, right by the ramp.	There was construction going on at main entrance covering 1/2 - 3/4 of the path. The separate accessible entrance is far and around the back past the garbage and parking garage. Desolate. The main entrance could be accessible, except its very far from the voting room and also very odd. (See photos #4 & 5). It is a steep u-shaped built-in ramp with slope 3:24.		There is a built-in descending ramp right after turning left in the poll room. The slope is 3.5". Sharp slope to the floor, not accessible or safe. There were boxes of ramp parts not built in the closet.			Pia Bouman		Coordinator said not enough signs were provided.	
5		Bayard Rustin HS	351 West 18th St., New York, NY			Badly beveled door lip. (See photo #6). Inner section is broken/badly worn, makes it difficult to go over. Cone and object used as door stopper are interfering with easy access. (See photo #6).					Margo Flengold			Not for general public
6		Max Meltzer Community Ctr	94 East 1st Street, New York			A folding chair was holding door open, narrowing the width clearance. (See photo #7).					They do not seem to be aware that they need an ADA coordinator.			
7		Lesbian and Gay Ctr	208 West 13th St., New York	Two ramps		One side of the path was clear, the other had a sandwich board on top. (see photo #8).				Mat over wires might move. Need to be properly secured.	Paul Rhodes			
8		Carlyle Court	25 Union Square West, New York					ADA privacy booth has 4'2" clearance.		You can only approach BMD from one side, poll workers think you should be able to approach from both sides.	No ADA coordinator		Workers complained that it was very difficult to set up their site in the lobby of a dorm and that students kept traipsing through from the elevators. They had to move to this lounge from a different building which had a ramp with a slope that was too steep. There were not enough plugs and too many windows to set it up in an ideal way.	

9	PS 47, School for Hearing Impaired	225 East 23rd St., New York	The ramp had less than 5' turning space.		the interior ramp in the cafeteria area changes direction, has less than 4 feet level landings.			Ramp would be a school issue.		ADA monitors. They are trained. They report they are supposed to check BMD operation and obstacles.		
10	Tweed Court	52 Chamber St. New York	Portable metal ramps in 2 pieces, with rise of 4", no need for handrails.		The path has a bit of slope up. Entrance door it's heavy. The door is not open. No one was helping to open the door.			The double leaf door is heavy and was not open		No ADA coordinator Updated 2015, but appears to be the same		
11	PS 3	490 Hudson St. New York						Mat over wire to BMD needs to be secured to the floor.		Cannot understand signature	Poll site is roomy and accessible	No Bathrooms upstairs and no elevator.
12	PS 154	250 West 127th Street, New York	The ramp is short and has a lip 1 1/2" high. The pavement at the exit is uneven. (See photo #10).		The route to the accessible entrance - 126th St. is in bad shape - with abrupt level changes. The sidewalk is cracked and uneven. (See photo #9).			The Ballot Marking Device was not working. The Coordinator said she called it in but no one has been by to fix it.		Deirdre Rock		
13	The Jackie Robinson Complex	1573 Madison Avenue, New York		No Barriers						Ronnie Howard		Yes
Queens												
14	PS 29, 125-10 23 Ave	College Point, Queens, NY 11356		No Barriers								
15	PS 98-Douglaston School	40-20 235 St., Queens, NY 11363		No Barriers	Ramped- Door closed but there was a doorbell and a door monitor.			Table by BMD was removed		Sherman Gumer	There were obstacles, for example the cone at entrance but this was removed.	
16	PS 214-Cadwallader Colden	31-15 140 St., Queens, NY 11354		Needs more signage						Peter		Bathroom had no stall=30" between side and stall
17	PS 94-David D. Porter	41-77 Little Neck Parkway, Queens, NY 11363		No Barriers								
18	PS 129-Patricia Larkin	128-02 7 Ave., College Point, Queens	There was an unassembled temporary ramp on the ramp							Gerald Centro		
19	Aguilar Gardens	156-11 Aguilar Ave., Flushing, Queens, NY 11367	Inaccessible Ramp. Ramp was 4:24.							Jack	This residential building has an integrated ramp as part of the building sitting on a hill that makes the ramp measuring 4:24. Then there's another ramp into the building that measures 3:24. photo available	
Brooklyn												
20	Unity Plaza Community Center	576 Blake Ave., Brooklyn, NY 11207	no handrails on ramp							Malinear Mc Guzy		
21	Transit Tech High School	1 Wells St., Brooklyn, NY 11208			Door monitor opens door and guides. Cone blocks access on ramp (See photo #12). All doors 35", no signs. (See photo #13).	Elevator-worker guides voters to correct floor.	Opens to gymnasium	Materials on the floor prevent people using wheelchairs from getting to the BMD. (See photo #11)		Marie Harley	Space on BMD fixed, coordinator said they just got tables at 11 am.	

22	PS 224	755 Wortman Ave., Brooklyn, NY 11208	Ramp had 53" width of turn around space. Person in a wheelchair reported having difficulty getting on the ramp. Difficulty making turn (See photo #15).	There were no signs on Wortman Avenue or Hemlock St. to show the way. Signs weren't placed on East side of building only front entrance.	Entrance at the back of school. The lip at entrance was 1" high. See photo #14).		Wires exposed too close to machine (see picture), staff moved it.			Darlene Coleman		Wire tripping hazard, It was fixed	
23	IS 302	332 Linwood St., Brooklyn	No Barriers							Drena Douglas		Possible door monitor unclear of person could see someone with w/o approaching	
24	PS 290	135 Schenck Ave., Brooklyn	2 ramps, first 1:24, second 2:24 no railing on one side (See photo #17).	Signs confusing, they point in both directions. (See photo #16).						Abigail Ryan.		Space corrected when told sidewalk hazard (picture).	
25	PS 321	180 7 Ave., Brooklyn, NY 11215	Temporary ramp poorly designed, handrails missing, missing caps at the end of the rail. There was no place to install the missing section of handrails. (See photo #18). Ramp slope 4:24.		The door opening is 28" wide with push bar.		There is 5' clearance on one side of the BMD. Power station and BMD sign blocks the other side. Electrical outlets are limited so other equipment is plugged into the power station on the other side.			Kate	Yes	The Poll Worker manual, gives instructions for clearance on one side.	No
26	William Maxwell High School	145 Pennsylvania Ave., Brooklyn	Ramp very long, should have landing. (See photo #19).							Helen Jones.			
27	Manta Rosa Sports Club	3386 Atlantic Ave., Brooklyn, NY	The landing on the ramp is 40" and with door closed not enough clearance to open. Rang bell but door clerk did not respond.				There is a 1/2" lip at entrance to voting area. There was clear access at one side to get to the BMD.	The site is small but the equipment could be arranged better to have access. There were too many chairs with people sitting around.		Site Coordinator at lunch spoke to Linda.	Yes		Yes
28	PS 38	450 Pacific St., Brooklyn, NY	The slope of the ramp is 4:24 ramp		Broken sidewalk leading to accessible entrance. The lip at the entrance is approximately 2" high. (See photo #20 & 21).								
29	Brooklyn Prospect Charter School	Ft. Hamilton Parkway, Brooklyn, NY			The door was hard to open.		The BMD had 4 feet clearance.						
Bronx													
30	PS 194	2365 Waterbury Ave., Bronx, NY 10462	The ramp had no edge protection. It led directly in the building.		The main door was closed and a bit heavy for some people.			The BMD was pushed up to the wall due to no extension cord.	BMD was working but had no extension cord and poll worker was sitting next to it, not sure if people could use it.	Richard Ashby	Yes		Yes
31	IS 192	650 Hollywood Ave., Bronx, NY 10465	Saddle at entrance of ramp is 1": looks steep-too dark to measure. Landing = 4'x 4'		Door opening is 31"		BMD had 4'3" clearance.		Barriers for BMD-chair- BMD 4' 3" to wall	Was out on break		Poll worker moved BMD and chair blocking BMD.	
32	MS 101, Edward R. Byrne	2750 Lafayette Ave., Bronx			Double leaf door. Door opening is 31"					Poll site Supervisor			
33	JHS 131 Albert Einstein	885 Bolton Ave., Bronx, NY 10473		From inaccessible entrance there is only one sign pointing to accessible entrance, but pathway to entrance is long	2 Entrances/ Door is only 31" Not clear which is main entrance but believe inaccessible entrance is not the main one.		BMD is distant from door and desks-but they are using whole room.			Kevin McQuay			No
34	Locust Point Civic Hall	4400 Locust Point Dr., Bronx, NY 10465	2 ramps- 2nd ramp does not have 5'x 5' landing. Landing is 4'x 5'				No interior path.	No interior path	BMD moved out. Chair in front of BMD - BMD too close to the wall	None		Door monitor inside closed door	
35	Hutchinson River Community Center	1950 Hutchinson River Parkway, Bronx, NY 10461	The ramp to the main entrance is extremely high.		The pathway is cracked and the ramp to the main entrance is extremely high.					Louisa	Yes		

36	Jaime Towers	2050 Seward Ave., Bronx	Ramp is 35" wide.	Long distance to accessible entrance, not enough signs.		Not enough signs. No interior signs			Moved BMD away from wall at my recommendation and cleared path between privacy booth and BMD. barriers were removed, chair moved & BMD moved to give 5' clearance.	Natalie Lawson			
37	PS 53 - Annex	360 East 168 St., Bronx			Door opening only 27". Accessibility coordinators have to help people squeeze in. (See photo #22).		BMD surrounded by equipment tables, chairs, etc. Only 3' and 2' clearance.		BMD surrounded by equipment tables, chairs, etc. Only 3' and 2' clearance. Corrected BMD but cant correct narrow door. (See photo #23).	Rosalind Gardiner			
38	Bronxworks Heights Sr. Citizen Center	200 West Tremont Ave., Bronx			There is a double leaf door and the second one is 31" wide. the door clerk said a man had trouble trying to get through and said he had to back out. (See photo #24).			There's an elevator to second floor where voting is done. There was only 3' 1" turning space near BMD. Poll worker corrected it. Schematic photo shows whole room available for use but only half was available.	Stand sign- Moved to prevent blocking	None		Poll site was supposed to be fully available but isn't. This will cause crowding at presidential election if not addressed	
39	Bronx Psychiatric Center	1500 Water Place, Bronx										CIDNY surveyors were told the site could possibly have been moved to the building across from designated site but they were not allowed in to verify	
Staten Island													
40	PS 19 The Curtis School	780 Post Ave., Staten Island	3 ramps going into the building. All slopes were good. 2 ramps were metal and were put on top of the built-in ramp. The slope was fine. The second ramp had a 1.5" lip.							Sebastian Anyanuu		3 ramps going into the building. All slopes were good. 2 ramps were metal and was put on top of the normal ramp. The slope was fine. There was 1.5" lip to sit on.	
41	Summerfield UMC	104 Harbor Road, Staten Island, NY 10303			The sidewalk is broken out front. (See photo #25). The entrance door has a lip that is 1.5" 2". There was a door monitor.					Shanda Scott-Arline B caute			
42	Cichon Post	100 Innis St., Staten Island, NY 10302			It is through a gravel parking lot with spots of grass There's a 1.5" lip. A woman was holding the door open at the accessible entrance where there was no one there earlier. The parking lot to get in the accessible door is very bad. (See photo #26).		The lighting could be better The space was tight.	A woman was holding the door open at the accessible entrance where there was no one earlier. The pathway through the parking lot to get in the accessible door is in very bad condition, with broken pavement and patches of grass.		None		I was taking pictures from the outside and a man came out and asked me questions.	The doors were small
43	PS 44 Thomas C. Brown	80 Maple Parkway, Staten Island, NY 10303	The ramp was short - 2.5"-3.0", not even. No one in a wheelchair could make it.							David Thomas		The ramp was not good- They did show me a different ramp that was ADA perfect. I asked then why they did not use . I was told the BOE said use the other one
